

LED TRAILER INTERFACE

Part No: **LTI-12**

The LED Trailer Interface enables trailers with LED lamps to be towed by vehicles with genuine trailer kits. It is waterproof and suitable for marine environments.

LTI-12 LED Trailer Interface Features:

- Works in conjunction with genuine trailer kits.
- Allows the vehicle's trailer kit to detect a trailer which uses LED lamps.
- Intelligently filters vehicle lamp detection pulses. Stops any intermittent LED flickering.

Installation Notes.

The LTI is mounted on the trailer draw-bar and wired between the trailer connector and trailer LED lamps as per the above diagram.
