

ANYTHING ELECTRONIC (NZ) LTD.

TURBO DELAY

Part No: TDM-12, TDM-24, TDM-24S

INSTRUCTIONS

Wire the unit as shown. The OVERIDE and TIME SELECT switches are mounted on the dash via 7mm holes as shown. The TIME SELECT switch is mounted with it's unused terminal uppermost so that in the CITY position the shorter time is selected. The HWY (Highway) position selects the longer time period. The two switches should be mounted 55mm apart with the decal placed between them.

A warning alarm will sound during the delay period to alert the driver. This prevents the dangerous situation where the vehicle could be driven with the key off causing the steering to lock.

If the vehicle is switched back on during the delay period the alarm will continue to sound until the delay is finished. The alarm can be disabled by pressing the OVERIDE button.

Warranty statement on reverse.
