DIGITAL TIMING LIGHT

Part No: TL-12

INSTRUCTIONS

The TL-12 triggers from low level digital pulses as well as its standard inductive pickup. It is designed for timing multi-coil, distributorless vehicles such as Bluebird and Subaru by deriving its timing signal from the digital ignition pulses from the ECU.

Digital pulse levels greater than 2V will trigger the light, hence it can be used to detect crank angle and TDC pulses, electronic ignition trigger pulses, injector pulses etc.

It is used as a standard ignition timing light by using the inductive pickup on an HT. lead.

The input selector switch is on the rear of the unit:

PULSE Low level trigger pulse input.
COIL Coil primary (-) trigger input.

GUARANTEE

1. TWO YEAR WARRANTY

This product is guaranteed by the manufacturer ANYTHING ELECTRONIC (NZ) LTD 'AE(NZ)LTD' against faulty parts or manufacture for a period of TWO years from the date of purchase, but nothing in this guarantee limits or restricts any statutory right or remedy available to the purchaser.
